The action of the brave young lady during the exciting and perilous incident were those of a heroine and her charms and traits at once found in James a deep admiration while his gallantry met with an equal realization. Little cupid here interposed and did the rest. The Prospector joins in hearty congratulations and wishes for the devoted pair a life long continuance of riches in mutual affection and likewise of happiness and material possessions.

Printing With Ink.

A company has been formed to control the process of printing without ink, by using electricity and chemically prepared paper. In a short time, it is expected, this innovation will be completely introduced, and old methods revolutionized. There is one thing, however, that has resisted all innovations; that is Hostetter's Stomach Bitters, which has many imitations, but no equals as a cure for stomach, liver and bowel troubles. This perennial remedy has been the standard medicine of the American people for the past fifty years. It is a wonderful medicine for dyspepsia, indigestion, biliousness, insomnia, constipation and nervousness. It keeps the stomach in good condition, and the bowels regular. Try it, and you will not be disappointed.

THE FOREST FIRE

The Huachuclas Suffer Loss of Valuable Timber

The forest fire in the Huachuclas is still burning and threatens to destroy the most beautiful and scenic portion of the Huachucla range. The fire started on Sunday last on the south side of the Huachuclas. A day later the fire was at the top of the range over Hay and Tanner Canyon and has since spread a distance of over six to eight miles in the most heavily timbered section of the range. The fire is all within the confines of the military reservation of Ft. Huachucla—the largest in the territory. It will be exceedingly difficult to stop progress of the fire and will doubtless only end when it will have reached the bed of the cañons on either side. The glare of the fire can be seen from Tombstone and the fire is evidently burning as fiercely as ever. It is thought the military department at Ft. Huachucla will make an effort to stop progress of the faming fire before it encroaches too near the recreation headquarters.

From Thursday's issue:

AN ARIZONA OUTLAW

A Desperate Character With a Hard Record

The Republican publishes a picture of Augustin Chacon believed to be the leader of the band of four Mexicans who killed Olson and Stewart at New River Wells. The Republican says Chacon is said to have a mania for murder and a record of twenty victims. He is a native of Chihuahua and a prize was set on his head by the government of Mexico. He had committed several murders in Chihuahua and Sonora, three of his victims being women. He arrived at Mesquite about five years ago and is believed to have committed many murders in that neighborhood. He was convicted of one at Solomonville and sentenced to be hanged. On the night before the day fixed for his execution he escaped from jail in a more or less mysterious manner. He was known for some time after to be at the head of a band of outlaws in the mountains of eastern Graham county. The band which Chacon drew around him after his escape consisted of eight men, of whom five have been killed. The other three and the leader are believed to be the men who committed the New River crime, who had six months before burglarized a store at Globe and then went into rendezvous on Mineral creek in Pinal county.
